The country was immense, occupying approximately one-third of Central America. From the Caribbean Coast, it extended north to include the eastern region of Honduras, south to the border of Costa Rica, and west to include the Central Highlands. It included 60 percent of present-day Nicaragua. Spanish Pacific Coast, and its acquisition of European weaponry to defend its political independence and territorial integrity from repeated Spanish incursions.

Displaying a remarkable political continuity, which rivaled many of the Royal Houses of Europe, the Miskito kingship was held by a single family for the last 239 years of the state's existence. The kingdom was a stable and successfully, indigenous country in a region often convulsed by Spanish colonial political turmoil.

In 1638, London officially recognized the Miskito Kingdom as a sovereign state and in 1710, concluded an official treaty of friendship and alliance establishing a protectorate over the country that would endure for nearly two centuries.

Washington became acutely interested in the Miskito Kingdom during the California Gold Rush (1848-1855). Travel across the Miskito Kingdom to the Nicaraguan Pacific Coast then by ship to California provided a quick and safe passage for Americans journeying from the Eastern States to the West Coast. U.S. businessman, Cornelius Vanderbilt who operated a railroad in Nicaragua used by these Americans, proposed building a canal to facilitate the journey. Washington wanted American control over such a canal. Since the Atlantic Terminus would be the Miskito port of Greytown, Washington engineered the overthrow of the British Protectorate of the Miskito Kingdom. This would occur in four steps continuing even when the proposed canal was abandoned.

First, Washington negotiated with London on building a transoceanic canal. This resulted in the Clayton-Bulwer Treaty of 1850. Article 1 set the stage by calling for the neutralization of the Miskito Kingdom. The governments of the United States and Great Britain hereby declare, that neither the one nor the other will ever obtain or maintain for itself any exclusive control over the said ship canal; agreeing that neither will ever erect or maintain any fortifications commanding the same or in the vicinity thereof, or occupy, or fortify, or colonize, or assume or exercise any dominion over Nicaragua, Costa Rica, the Mosquito coast [the Miskito Kingdom], or any part of Central America.

This left the Miskito Kingdom defenseless, exposed, and vulnerable.

Second, in 1859, the U.S. pressured a London shaken by the 1857-58 Indian Mutiny to agree to surrender the Bay Islands and northern third of the Miskito Kingdom to Honduras.

Third, as the American Civil War approached some U.S. politicians

called for a war to annex British North American colonies.

[vi] At that time, London's military position in the Western Hemisphere was weak. The Union Army would eventually total over 2.2 million men, while the British had only 4,300 troops in all North America and a few, scattered garrisons in the Caribbean.

[vii] In an attempt to prevent the U.S. from invading or encouraging Nicaragua to invade the Miskito Kingdom, London signed the *Treaty of Managua* in 1860. An independent kingdom that had encompassed one-third of Central America was reduced to a reservation occupying a sliver of land on Nicaragua's Atlantic Coast.

[viii] By this treaty, London sought to preserve the autonomy of the Miskito Kingdom, now called the Miskito Reserve. However, Nicaragua attempted to annul these provisions. London and Managua submitted their conflicting interpretations of the treaty to international arbitration. Austrian Emperor Francis Joseph I heard the case and on July 2, 1881 rendered his decision supporting the British and Miskito interpretation.

[ix] Fourth, in 1894 the U.S. supported Managua in rejecting this decision and annexing the Miskito Reserve.

The administrative institutions established by the Nicaraguan government after 1894 were held by Mestizos from the Pacific areas of the country. Creole culture and the English language also came under attack from the Nicaraguan government, which tried to generalize the Spanish language and Hispanic culture among the inhabitants of the Mosquitia. In Bluefields, for example, special policemen were sent to scout for school children to put into Spanish public schools.

and Creole. Instead, it partitioned their land into two autonomous regions and continued the colonization and exploitation of their land. This policy was continued by successive regimes and the returning Sandinistas.

In 2008, the UN Committee on Economic, Social and Cultural Rights noted the existence of racial prejudice against indigenous and Afro-descendant women in the Autonomous Regions; as well as serious shortcomings in the health and education services and the absence of a consultation process to seek communities free, prior and informed consent to the exploitation of natural resources in their territories.

[xv]

Nicaraguan colonists came from all areas of the national territory, invading ancestral lands, pillaging community property, and preying on the habitats of indigenous peoples.

[xvi]

In the past 10 years, approximately 100 people many of them leaders in their communities have been killed during confrontations with colonos

according to CEJUDHCAN, a human rights organization. It's a form of genocide, says Dolene Miller, a member of the National Commission for Demarcation and Titling... Just like the Spaniards came to this land hundreds of years ago and committed genocide against the natives, the mestizos are trying to get rid of us to colonize the land.

[xvii]

The objective of Nicaraguan colonization is to alter the demography of the autonomous regions. It is to establish a Nicaraguan majority, so if the regions were allowed to vote on independence it could be defeated democratically. This is the strategy currently being employed by Morocco in the Western Sahara.
